Close

This year's Geriatrics4Juniors is a fully virtual conference – our first! Meeting delegates, having interactive sessions and connecting doctors interested in geriatrics have been some of our favourite parts of previous conferences.

This year is different but we are still hoping to re-create some of this using our online platform **SWAPCARD**. With this, there is the opportunity to engage in question polls during the live streamed sessions; with Q&A sessions after each talk and to connect with the speakers, the AEME team and other delegates during the day. We will be holding a live panel discussion, "**Ask the registrars**", over the lunchtime break so you can hear about an "average day" in the life of a geriatrics registrar and ask all your burning questions about being the Medical Registrar on call!

Finally, our **OPMentor** scheme is an opportunity for junior doctors of any grade who are interested in geriatric medicine to find some informal support with their career development. We have a network of geriatricians across the UK willing to provide advice on careers, CV building, specialty applications, audit & quality improvement projects, research, and information about working in their region. Please visit <http://aeme.org.uk/opmentor/>

To register for the conference, please visit <http://aeme.org.uk/g4j20/>

Please enter our poster competition - tell us about work that you've done to improve care for older patients and you could be our 'CotE Champion' for 2020! For more information, go to <http://aeme.org.uk/g4j20-posters/>
